In not more than 20 words show what are the adventures of scooters.

Many young people prefer scooters to bicycles for many reasons : firstly scooters are much faster and not need much physical efforts. Secondly , the driver can take a passenger with him on the seat behind, above all riding a scooter gives a young man a feeling of independence because he can travel further and impress his friend.

On the other hand scooters have many disadvantages : they are more expensive to buy and to repair. Also scooters encourage young people to take risk by going too fast as a result, scooters are involved in more serious accidents because there are more cars and drivers often do not pay attention to bikes - In addition, many cyclists do not know the rules of the road.
